restaurants

- The **r-Book** solution is based on the Livebookings **Console** solution. Livebookings is the most experienced provider of realtime restaurant reservations technology in the UK and currently provides online bookings to over 1600 restaurants throughout the country.
- With 18 booking channels to choose from, restaurants have the potential to reach over 4 million web customers and benefit directly from the joint marketing capabilities of leading companies including American Express and lastminute.com.
- Livebookings' technology is the choice of many of the UK's best known restaurants including; The Ritz London, Conran Restaurants, The Witchery, Le Gavroche, Bank Restaurants, Planet Hollywood, Tamarind, The Cinnamon Club, Apex Hotels, and The Rainforest Café among many others.
- **Console** is a low-cost restaurant reservations & customer management system developed by Livebookings that allows restaurants to receive internet bookings from multiple websites, whilst retaining centralised control of all their table availability.
- **Console** can be a total replacement for your old diary, managing telephone bookings and walk-ins, as well as your web bookings. Alternatively, you can simply use the software to control your online business – you choose!
- The **Console** solution works in much the same way as an online banking system and can be accessed via any internet connection. There is a small setup cost and just a £20 per month licence fee.
- Restaurants are provided with a free realtime customer booking interface which can be added to an existing website or integrated into a new one as part of the design and build process.
- The comprehensive database facility within allows you to see your customers' booking histories, send out marketing messages free of charge and attach your own notes to customer records.
- **Console** also allows restaurants to interrogate their booking statistics month by month, in order to analyse the success of different websites and specific promotions.
- Invoicing from the network of booking partners is coordinated through Livebookings – you receive one booking bill at the end of the month.
